

WAX RECOMMENDATION **TOKO**[®]

Potato Cup

Mink Creek Nordic Area, Pocatello, ID

Saturday, January 29

11 A.M.

5K/10K/15K Skate

Mass start

1-3 laps

WWW.POKYXC.ORG

Forecast/Conditions: Friday night low of 10F, start temperature of 22 and a high of 27. The track will be packed firm and should remain cold after several cold nights. Humidity will be around 50 percent with mostly sunny skies.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on a thin layer of High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply HP Blue Hot Wax, scrape and brush.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
