

# WAX RECOMMENDATION TOKO®

## Potato Cup

Mink Creek Nordic Area, Pocatello, ID

Saturday, January 27

11 A.M.

3K/5K/10K/15K Skate

Mass start

1-3 laps

[Pokyxc.org](http://Pokyxc.org)

**Forecast/Conditions:** Forecast of 2-4 inches of snow Thursday. Cooler on Friday with a Friday night low of 21 degrees, around 29 for the race start with a high of 35. Course will be PistenBully groomed Friday night and conditions should be excellent for this race.

**Glidewax:** Be sure to start with clean skis if you have been skiing warm and dirty snow. Apply Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Red, iron in, let cool, scrape and brush. If you do not have HP Powder, apply Performance Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
